

Atomic Aquatics established the most diver-friendly warranties in the industry

Some call it courageous. Others say it is brave. We think of it as confident. It takes real confidence to stand behind products with warranties that empower divers to really use their equipment for epic diving. Why are Atomic equipment warranties so courageous? Because of the are fully selected materials and groundbreaking designs that deliver outstanding performance with minimal maintenance. Atomic materials are resilient and corrosion-resistant. Atomic equipment is designed to perform repetitive actions smoothly with minimal wear, resulting in less maintenance. And that gives Atomic divers confidence as well.

Dive two years or 300 dives without required servicing.

The Atomic Limited Lifetime Warranty is not contingent on proof of annual service.

Your regulator is the soul of your dive system. You don't need to worry about it performing...especially if you are in some remote location where competent repair is a remote concept. That's why every Atomic Aquatics regulator is built using materials and processes that resist corrosion and minimize maintenance – so you can log lots of dives over a long time with supreme confidence. While every regulator benefits from annual servicing, Atomic regs do not require it. So you can worry less and dive more with Atomic.

Why can Atomic regulators go two years without servicing?

Corrosion-Resistant Materials

Atomic Aquatics goes to great lengths to find materials that steadfastly resist the corrosive effects of ocean water.

But there's more to it...

Innovative Patented Designs

One reason regulators require annual service is what happens when they are stored between use.

Take a look at the Atomic differences...

Here's the official language – The Atomic Aquatics Limited Lifetime Warranty.

Atomic Aquatics warrants this regulator against defects in materials and workmanship for the lifetime of the original owner.
